**Hardware = ~~\$685~~ WAIVED\*!**

**Installation = \$99!**

No hidden Loop or Internet Access fees!

30-Day Money Back Guarantee!

No Term Contracts!

## Secure...

Your PCS1 Wireless Broadband is **as secure as a wireline T1!** Our proprietary software links your CPE hardware to our base station without fear of intrusion.

## Quality...

With nearly **four 9's of availability**, our network out-performs most carrier-class networks. With increased actual throughput and only **2 hops to the Internet**, PCS1 even **out-performs a standard wireline T1.**

## Service...

**Installation takes place within 3 to 5 days** once we receive your order! Plus, our **high level of customer service** assures your satisfaction!

## How it works...

Our network utilizes license-free spectrum to deliver low-cost IP/Ethernet data access to you business. Data is transmitted from one of our nearby base stations to an antenna at your location. We run a cable from our antenna to your CPE hardware thereby enabling your network to connect to the Internet.

PCS1 Wireless Broadband compares at a cost-per-Mbps far less than a traditional T1 or DSL connection!
