PCS1 Announces Free Basic Dial-Up Internet Access for Existing and New Customers

North Hollywood, Oct 25, 2004

PCS1, a leading provider of voice and data services, launched today its new, nationwide dial-up Internet access service – free of charge to new and existing PCS1 customers. This service provides a number of features that make it an attractive primary or secondary Internet access solution for small businesses.

Designed with our customers in mind, PCS1 Dial-up Internet service provides a nationwide network of Internet access points, a 24-hour customer support, basic firewall, spam filter, virus scanning on emails and pop-up blockers.

“This is in line with our commitment of providing our customers with superior service and unsurpassed value. It’s our way of thanking our customers for making us one of the most dynamic and fastest growing companies in California,” said James Moreno, Director of Special Projects.

Customers can now call PCS1’s toll-free number, 1-800-881-7054, to request their free dial-up installation kit.

About PCS1

PCS1, formerly Pacific Centrex Services, is a privately held, full-service telecommunications provider and manager of state-of-the-art Centrex-based telecommunications services. The Company provides small and medium-sized business customers in California with significant cost savings on high-quality local and long distance services, including value-added services such as voice messaging and ISDN/DSL Internet access.
